

Build a Lighthouse

CREATE • DESIGN • IMAGINE

Lighthouses help keep people safe along the coast by guiding ships with their bright lights. In this activity, you will build your own lighthouse using blocks, cups, or recycled materials.

Directions:

1. Gather your materials.
2. Plan your lighthouse design.
3. Build your lighthouse using blocks, cups, or recycled materials.
4. Add details like a light, windows, doors, or a base.
5. Make it strong and see if it can stand on its own.
6. Be creative and have fun!

Materials You Could Use:

- Building blocks or LEGO
- Plastic or paper cups
- Cardboard tubes (toilet paper or paper towel rolls)
- Recycled boxes, bottles, or containers
- Tape, glue, or scissors
- Paint, markers, or construction paper
- A small LED tealight or flashlight (optional for the light)
- Rocks, sand, or shells (for a base)
- Anything else you can think of!

Shine a light
on kindness,
courage, and
adventure!

Ideas for Details:

- Windows and a door
- A light on top (use a battery tealight or flashlight)
- Stripes or special colors
- A rocky base with sand or shells
- A small sign with a name (e.g., "Alabama Lighthouse")
- Surround it with water using blue paper, fabric, or a tray of sand/water play
- Use toy boats or animals to create a scene

Mobile Bay Lighthouse
(Fort Morgan, Alabama)

Lighthouses
remind us to be
a light to others.

Think About It...

- What materials did you use?
- What was the hardest part to build?
- How do lighthouses help people?
- Where are some lighthouses in Alabama (or other places)?
- If you could design a lighthouse anywhere, where would you put it?
- What does it mean to be a "light" for others?

"Let your light shine."

MATTHEW 5:16
