

Build Our City

CREATE • DESIGN • EXPLORE

Alabama is home to many cities, towns, bridges, and landmarks that help people live, work, and connect with one another. In this activity, you will build a simple skyline or bridge using blocks, LEGO®, or cardboard.

Choose Your Build:

- Build a simple skyline with buildings from an Alabama city (such as Huntsville, Birmingham, Mobile, or Montgomery).
- OR**
- Build a simple bridge like one you might see in Alabama.

Materials You Could Use:

- Building blocks (LEGO®, wood, etc.)
- Cardboard or paper
- Tape or glue (if needed)
- Recycled materials (boxes, tubes)
- Anything else you want to be creative with!

Think About It...

- What city or bridge did you build?
- What materials did you use?
- What was the most challenging part?
- What do you like most about your build?

Skyline Example

Bridge Example

Plan Your Build

Draw a quick sketch of your skyline or bridge before you build it.

*“Strong communities
are built one piece
at a time.”*
