

Watch It Grow

PLANT • OBSERVE • RECORD

Alabama's rich soil and warm climate help many plants grow. In this activity, you will plant seeds or observe different plants and record the changes you see over time.

Option 1: Plant Seeds

Plant seeds in a small pot, cup, or in your garden. Water them and place them in a sunny spot.

Option 2: Observe Plants

Choose plants you see around your home, yard, or neighborhood. You could observe a tree, flower, bush, or even grass.

Materials You Could Use:

- Seeds (beans, sunflower, etc.) or plants to observe
- Small pots, cups, or garden space
- Soil (if planting)
- Water
- Notebook or this worksheet
- Pencil or crayons
- Ruler (optional)

My Plant Observations

Date	What I See (Draw or Write)	Height (if able to measure)	Other Changes (leaves, color, flowers, etc.)

Think About It...

- What changes did you notice over time?
- What did your plant need to grow?
- Which part was your favorite to observe?
- How do plants help people and animals in Alabama?

*"He makes grass grow for the cattle,
and plants for people to cultivate—
bringing forth food from the earth."*

PSALM 104:14
