

Alabama Habitats

CREATE • EXPLORE • CELEBRATE

Alabama is home to many different habitats, from mountains and forests to rivers, lakes, and the Gulf Coast. In this activity, you will make a simple diorama or nature collage to show one of Alabama's habitats.

Choose a Habitat:

Pick one Alabama habitat to focus on:

- Mountains (Appalachian region)
- Forest (trees and woodlands)
- Rivers and streams
- Lakes and wetlands
- Grasslands and farmlands
- Gulf Coast (beaches, dunes, marshes)

Materials You Could Use:

- Shoe box or small box (for a diorama)
- Construction paper
- Glue or tape
- Scissors
- Markers, crayons, or colored pencils
- Pictures from magazines or printed images
- Natural materials (leaves, sticks, rocks, etc.)
- Other craft supplies (cotton, tissue paper, etc.)

Directions:

1. Choose an Alabama habitat.
2. Research or think about the plants and animals that live there.
3. Create a diorama inside a small box or make a collage on paper.
4. Include at least 3 plants or animals.
5. Label your habitat and the plants or animals (optional).
6. Be creative and have fun!

Think About It...

- What plants and animals did you include?
- Why do you think they live in this habitat?
- What do you like most about this habitat?
- How can we take care of Alabama's natural places?

*"The earth is the Lord's,
and everything in it, the world,
and all who live in it."*

PSALM 24:1

DISCOVER • RESPECT • PRESERVE

Alabama's
natural beauty
is a gift
to explore
and protect!
