

Build Horseshoe Bend

CREATE • BUILD • LEARN

Horseshoe Bend was an important Native American town on the Tallapoosa River. It was located inside a natural bend, which helped protect the people who lived there.

Use playdough, blocks, sand, or other materials to build a model of Horseshoe Bend.

Directions:

1. Look at the pictures and map below.
2. Use playdough, blocks, sand, or other materials to build Horseshoe Bend.
3. Try to show the river, the land, and the town inside the bend.
4. You can add homes, a council house, fields, or whatever else you want!

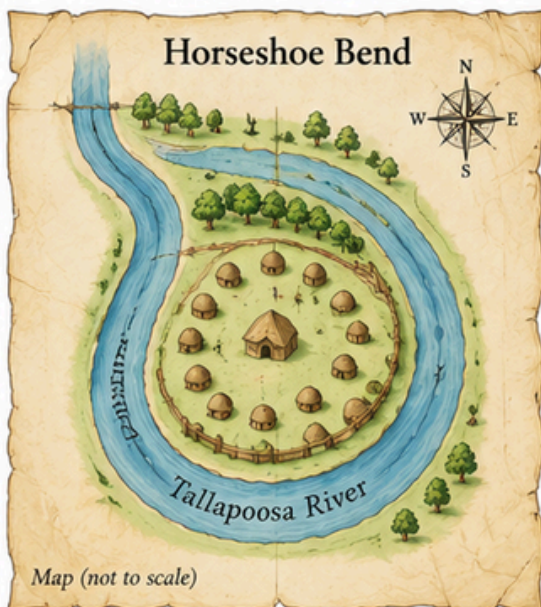

Artist's rendering of Horseshoe Bend

Things to Include:

- The Tallapoosa River (in a curved or "horseshoe" shape)
- The town inside the bend
- Homes (huts)
- A council house (larger building)
- Fields for growing crops
- Trees or a protective wall (optional)

"The land and the river provided both life and protection."

Map (not to scale)

Sand Example

Block Example

*Imagine what life might have been like living at Horseshoe Bend.
What do you think it would have been like to call this place home?*
