

Weave a Paper Design

EXPLORE • CREATE • LEARN • CONNECT

Long ago, Native Americans wove baskets and mats using natural fibers. Today you can weave with paper! Follow the steps below to create your own woven design.

1 CUT OUT THE STRIPS

Cut out the 8 paper strips on Page 2.

2 LAY 4 STRIPS VERTICALLY

Place 4 strips up and down in front of you.

3 WEAVE THE FIRST STRIP

Take 1 strip and weave it horizontally **OVER**, under, **OVER**, under.

Start on the left and go to the right.

4 WEAVE THE NEXT STRIP

Take a second strip and weave it the **OPPOSITE** way: under, **OVER**, under, **OVER**.

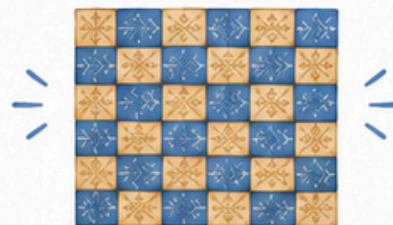

5 KEEP WEAVING

Continue adding strips, always alternating the pattern: **OVER**, under, **OVER**, under... then under, **OVER**, under, **OVER**... until all 8 strips are woven.

6 FINISH YOUR WEAVE

When all 8 strips are woven, push them together gently to tighten your design.

Optional: Glue or tape the ends on the back to keep them in place.

YOUR FINISHED DESIGN!

★ THINK & SHARE

What colors or patterns did you choose? Why?

What could your woven design be used for?

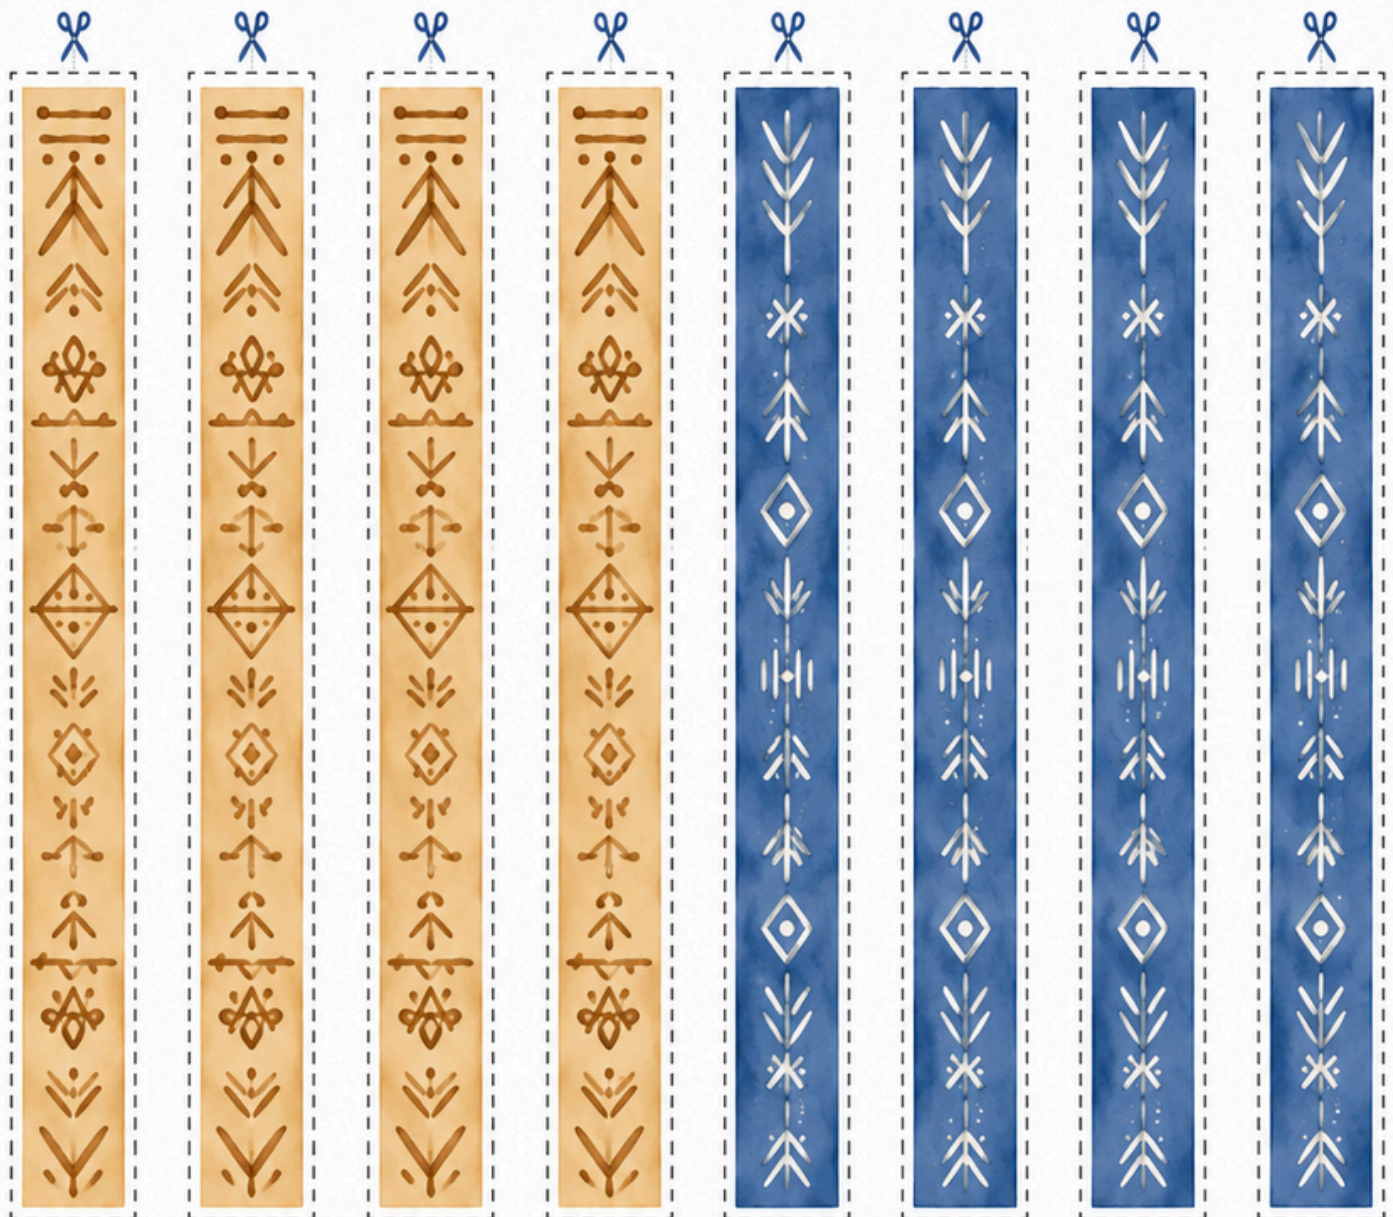

Great work! You're ready to weave!

Cut Out Your Weaving Strips

EXPLORE • CREATE • LEARN • CONNECT

Carefully cut out all 8 strips along the dashed lines.
You will use these to weave your paper design.

Great work! You're ready to weave!
